1 GENERAL

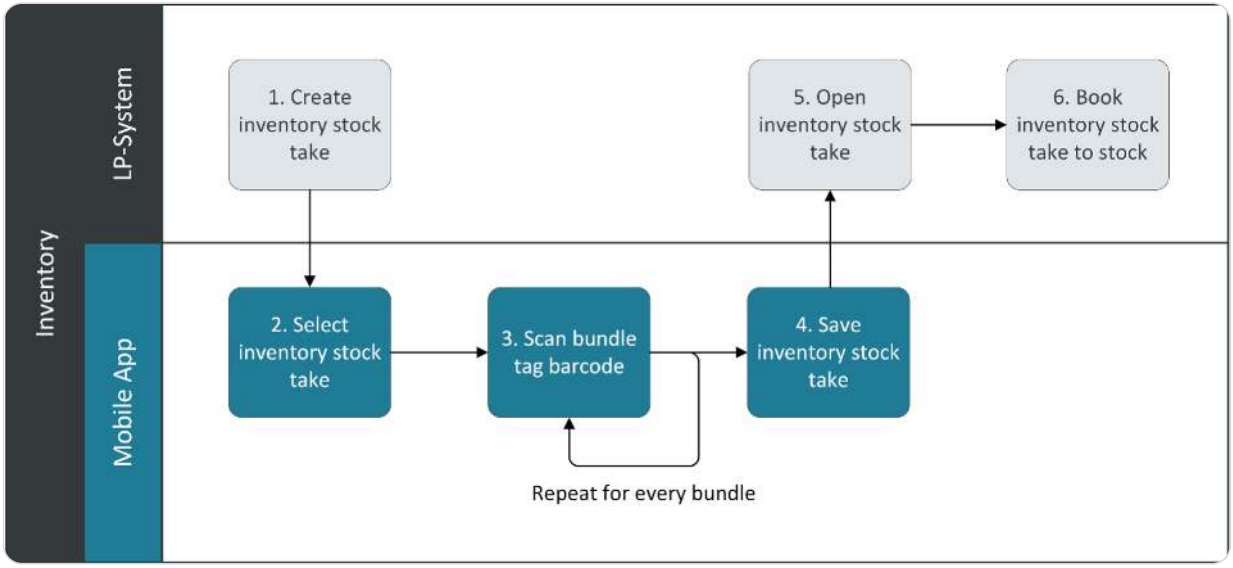

1.1 DESCRIPTION

The mobile app “Inventory” is designed to run on a mobile scanner. It allows inventory quantities to be recorded per bundle.

1.2 REQUIREMENTS

The mobile app requires a device running either Windows 10 (version 1809 or later) or Android (version 8.0 or later).

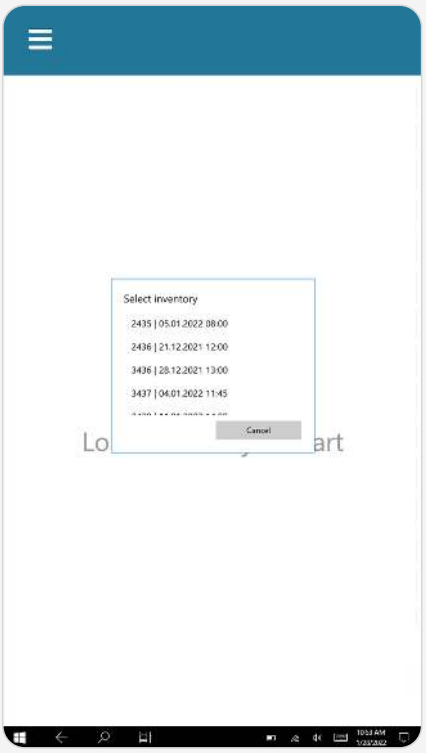

2 PROCESS

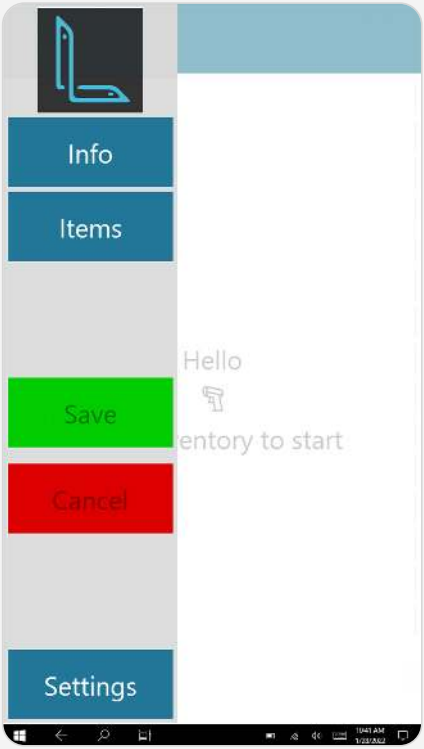

3 INVENTORY

3.1 MENU

1 The following screen is displayed after the application has been started.

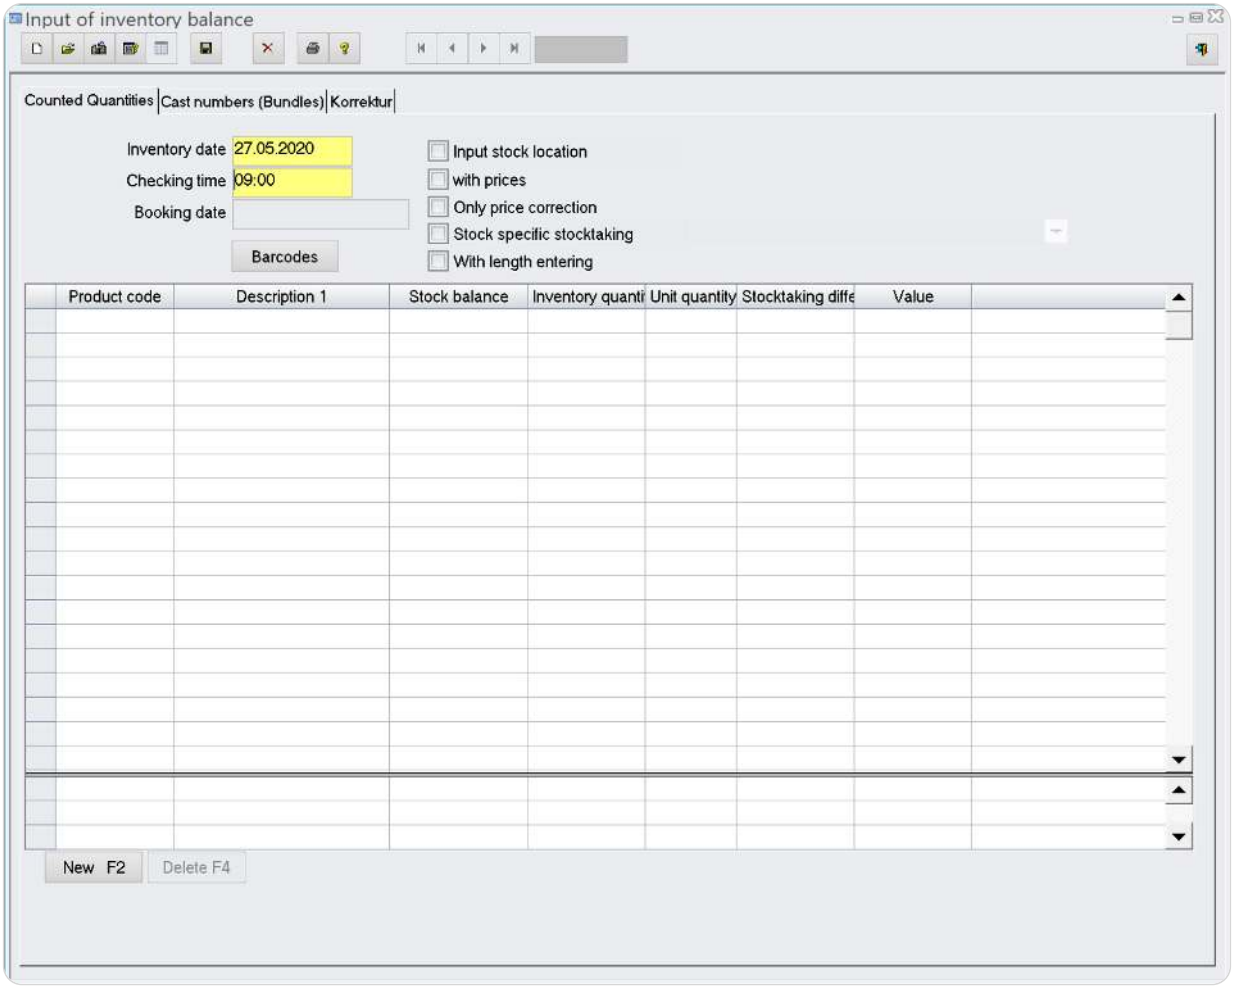

2 The button at the top left opens the menu.

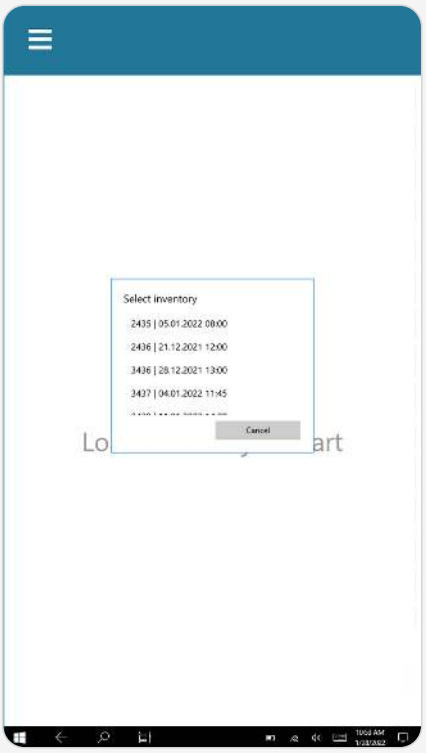

3.2 RECORDING INVENTORY QUANTITIES

To record inventory quantities, a new inventory stock take is first created in LP-SYSTEM.

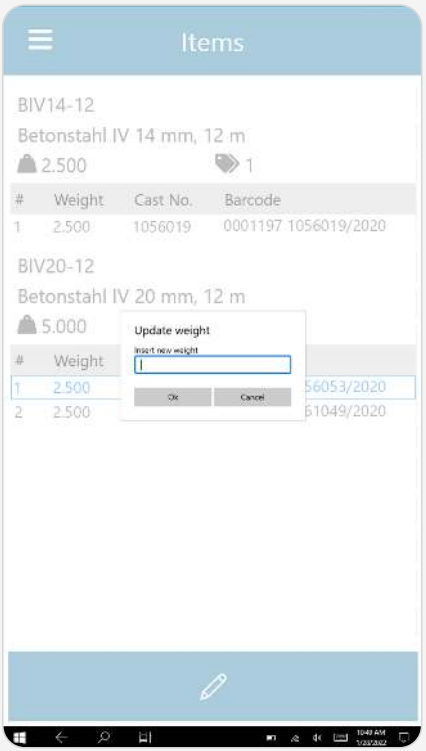

3 The app is then started on the device. After starting, or by clicking the “Refresh” button, a list of existing inventory stock takes that have not yet been booked is displayed. Select the required one here.

4 Now scan the bundle tag barcodes. A summary line is inserted automatically for each new product code. For each new bundle, a bundle line is inserted and the summary line is recalculated accordingly.

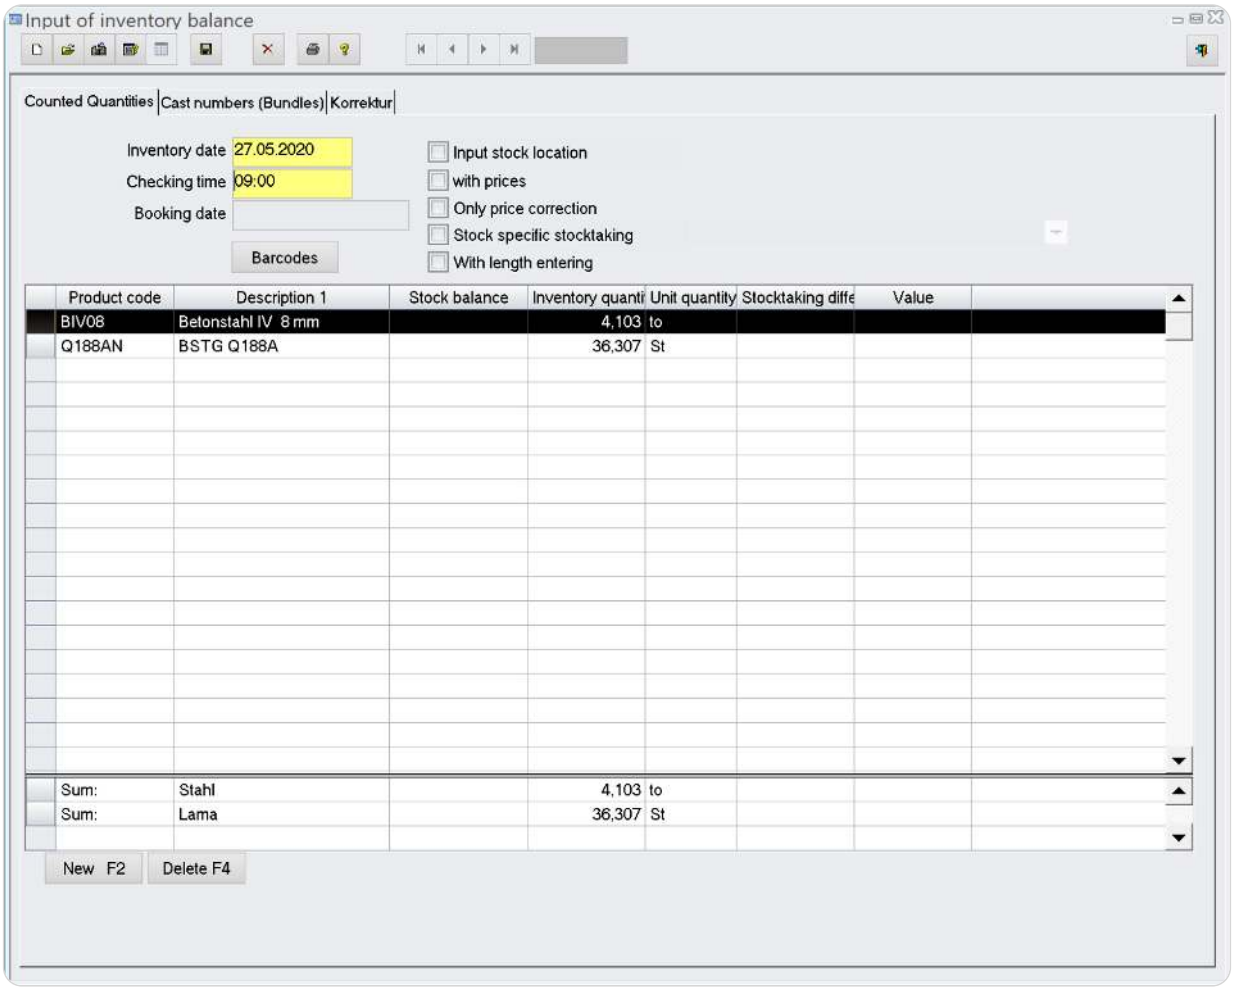

5 The bundles are taken over automatically with their entry weight. If this weight needs to be changed, select the bundle and click the edit button at the bottom.

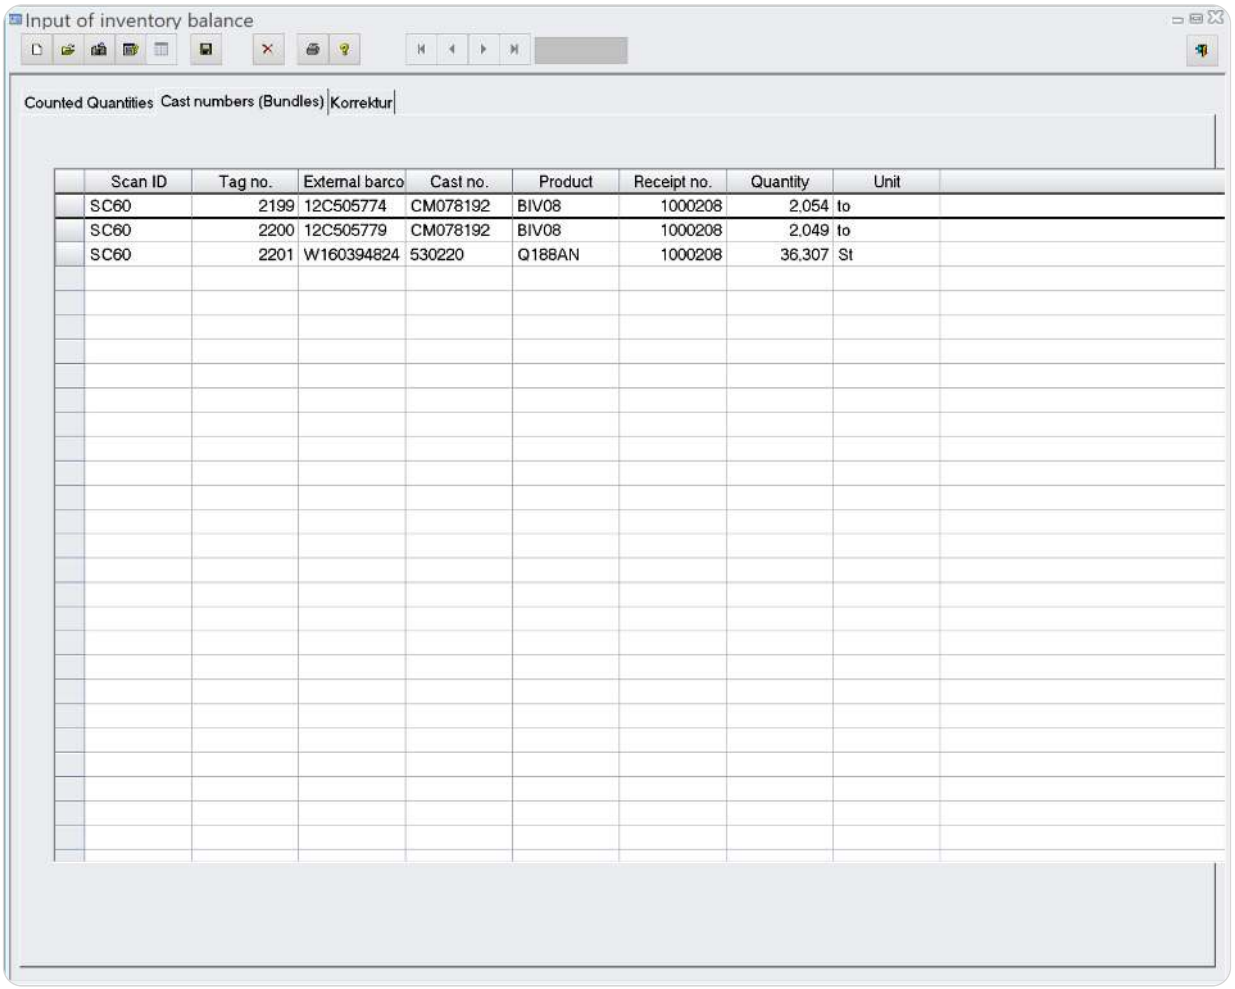

Once the inventory quantities have been recorded, click the “Save” button.

The inventory stock take with the recorded quantities can now be opened in LP-SYSTEM.

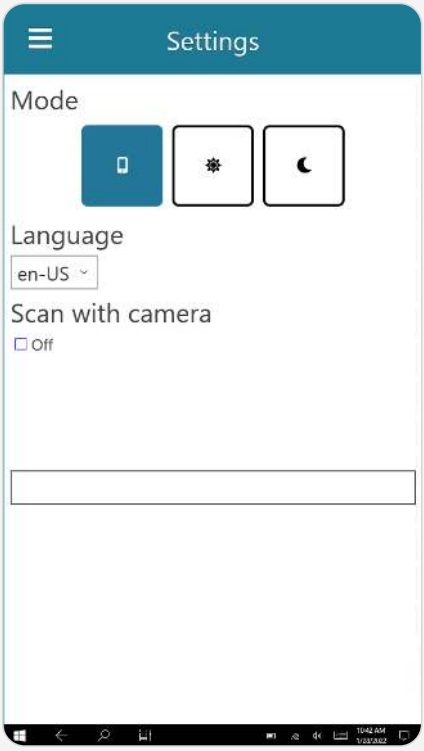

On the “Cast numbers” tab, the scanned bundles can be checked together with their cast numbers.

Scan ID	Tag no.	External barco	Cast no.	Product	Receipt no.	Quantity	Unit
SC60	2199	12C505774	CM078192	BIV08	1000208	2,054	to
SC60	2200	12C505779	CM078192	BIV08	1000208	2,049	to
SC60	2201	W160394824	530220	Q188AN	1000208	36,307	St

4 CONFIGURING THE MOBILE APP

1. Select “Settings” in the menu to configure the app. In the settings you can choose the language of the app.
